

Welcome to the World of OMEGA CUSTOM ENGINEERING:

SERVICE AND MANUFACTURING

OMEGA ENGINEERING

proudly offers the most sophisticated and extensive Custom Engineering capabilities in the process measurement and control industry. Our custom manufacturing capabilities extend "beyond the handbooks," and reinforce our customer service/customer driven philosophy. Whether you need a simple modification of a standard product or complete customized system engineering, OMEGA can accommodate your special request.

QUALITY MANUFACTURING, PEOPLE & PRODUCTS

Over 30 years of experience combined with our design and manufacturing ability has established OMEGA Engineering as a leader. Quality instrumentation has always been OMEGA's highest priority, but it is our dedicated, highly-skilled technical staff that ensure this quality and distinguish our products and service. From our computer aided design and manufacturing (CAD/CAM), to production and assembly, all the way through our quality control test center, OMEGA's expert personnel guarantee that your products are state-of-the-art perfect!

DISCOVER OMEGA'S ADVANTAGES:

"Beyond the Handbooks"

In the pages which follow, we illustrate our custom capabilities by sharing actual customer case studies (since it is physically impossible to show every custom variation we can provide). We encourage you to ask for any sensor, instrument or system you require and do not see mentioned here or in our handbooks. Not only can we design and build what you need, but we can also manufacture a product and inventory your special requests. But that's not all! When you work with OMEGA, you receive invaluable, free technical information that helps you select the products that best suit your application.
